Ankit Mehta

Business Analyst & Project Manager

ankitmehta141295@gmail.com | linkedin.com/in/theankitmehta | Delhi NCR, India

Business Analyst and Agile Project Manager with 5+ years in software delivery across banking, lending and wealth platforms. I lead cross-functional teams, manage multi-client portfolios, gather and shape requirements, and turn business vision into shipped outcomes.

Experience

Thoughtworks, Business Analyst May 2026 to present

- Working on latency and performance: identifying where a large financial product slows down and shaping the work that makes it faster and smoother for its users.

ScoreMe Solutions, Project Manager Mar 2025 to Dec 2025

Public and private sector banks and NBFCs (BOM, UCO, UBI, PNB, IB, IOB, IDBI, BB, BOI, SFL, Archbridge)

- Managed a portfolio of 10+ clients and led a cross-functional team of 70+, improving collaboration and productivity by 25%.
- Drove end-to-end execution, reducing project turnaround time by 20%; set up financial tracking that cut cost overruns by 10%.
- Introduced SAFe principles, Jira workflow automation and a single leadership dashboard across all clients.
- Trained BAs and PMs on client engagement, expectation-setting and conflict resolution; ran structured retrospectives.

HummingWave Technologies, Business Analyst May 2024 to Feb 2025

Finnable (NBFC)

- Enhanced the Loan Origination and Loan Management Systems with 30+ integrations; built digital lending journeys that grew revenue by 20%.
- Led decommissioning of third-party platforms and legacy migrations, saving ₹10L+ per month; unified lending platform cut operating costs by 25%.
- Authored 250+ end-user documents and ran workshops for a process-driven rollout.
- Worked directly with CXOs and Risk, Sales and Operations heads; managed 50+ pitches and demos.

Thoughtworks, Business Analyst and Consultant Jan 2021 to May 2024

Axis Bank

- Elicited requirements to transform the digital platform through Agile ways of working, achieving 2x growth.
- Set up a new cross-functional vertical working in Kanban, enabling 3x more onboarded users.
- Resolved 500+ critical production issues; built 2 teams from scratch for 10+ products.

Asset-based consulting

- Delivered products from inception that improved the assessment experience for 250+ clients in a year; drafted 3 legal agreements for a licensed product.

Blackstone

- Supported a cloud migration replacing a legacy platform, cutting costs by over $1M a year; redesigned a mobile flow that lifted engagement by 30%.
- Trained 15+ batches and organised 10+ events, including 3D printing and VR sessions.

Deloitte USI, Consultant Intern Apr 2019 to May 2019

- Worked on 7 M&A projects and change management in ERP and asset management for 5 clients.

Side project

Five Chips (sequence.website) 2026

- Designed and launched an online version of the Sequence board game, playable with friends or against the AI.

Skills

- **Analysis:** requirement gathering, BRDs, process mapping, solution and impact analysis, user stories, process optimisation
- **Agile delivery:** backlog refinement, sprint planning, RAIDD, Scrum, Kanban, SAFe, stakeholder management
- **Technical:** data mapping and analysis, UI/UX and wireframing
- **Tools:** Jira, Confluence, Trello, Miro, Balsamiq, Lucidchart, Clarity, UserExperior, MoEngage, NiFi, G Suite, MS Office
